"GREEN STOCKINGS"

A Five Part Picturization of the Famous Stage Success.

This story comes in the setting in a section of rural Texas, and the chief characters are men of means, leaders of the business of the country, and their families. The story is one of the importance of being married, of having a home, in the family atmosphere. The hero and his wife have been separated by the death of their son, and the wife has been left alone. After many years of suffering, she has found a new life in the company of her son's widow, who has come to take care of the house. The story is full of pathos and drama, and it will be enjoyed by all the old stage success.
